ack! Report as inappropriate The Fate of Ten This was an exciting chapter, I can't believe Sarah dies

The protagonist, Edward Prendick, finds himself stranded on an island with the notorious Doctor Moreau, whose experiments on the islands humans and animals result in unspeakable horrors. Authoritative, provocative, and consistently fascinating, this is a major book on one of the most important issues facing the West today. Never in John's short life has there been space for friendship or even love. With an enduring grasp of human nature, it teaches his readers how to handle people without letting them feel manipulated, how to make people feel important without inspiring resentment, how to win people over to your point of view without causing offence, and how to make a friend out of just about anyone. To finish what they started, they'll have to fight us first.

Agricultural civilization was a Faustian bargain, however: the prosperity and comfort that an agrarian society provides relies on the assumption that the environment will largely remain stable.
